## Risk

Before deciding whether to invest in the stock market you should take into account your savings, including pension arrangements, other short and long term savings schemes, life assurance and protection policies, as well as your levels of indebtedness. You should be prepared to invest your funds for a minimum of five years and preferably longer. Investors should be aware that past performance is not necessarily a guide to the future.

**The value of your capital will fluctuate and may fall as well as rise and you may not get back your original capital investments.**

Should you need to withdraw invested funds quickly, this also may adversely affect the amount you receive. If, having considered the above, you have made the decision to invest in the stock market; you should then decide the level of funds you wish to invest and your investment strategy. All investment decisions involve risk.
